

From fragmented market data to a governed decision workflow.

Equity Radar unifies watchlists, portfolio context, peer research, market positioning and scenario analysis. Every score shows its inputs; missing evidence stays missing; every model change can be replayed and rolled back.

DECIDE WITH CONTEXT

Entry, exit-review and position-aware actions across the watchlist, portfolio and company workflow.

EXPLAIN EVERY SCORE

Transparent technical, valuation, risk, peer, analyst and positioning evidence - with coverage-aware weighting.

LEARN WITHOUT HINDSIGHT

Point-in-time replay, immutable predictions, benchmark-relative outcomes and purged evaluation.
